

HouseKeeping (HK) structure

The HK structure is defined in mission_hk.c in both the OBC source code and the CSP-term. Please always change both of them together in order to receive the correct HK beacon.

1. HK tables collected by the HK beacon

```
#include <util/log.h>
#include <conf_hk.h>
#include <mission_hk.h>
#include <mission_hk_param.h>
#include <speqs.h>
#include <speqs_param.h>
#include <rbeacon.h>
#include <rbeacon_param.h>

#if !ENABLE_HKCOLLECTOR
